PROFESSIONAL SUMMARY

Quality Engineer with 2+ years at LTM, specialising in UI test automation using Cypress (TypeScript) and Selenium (Java), along with manual API testing. Leverages GitHub Copilot to accelerate test script development and design automated test cases. Proficient in BDD (Cucumber/Gherkin) and Hybrid frameworks, with hands-on experience integrating automation suites into CI/CD pipelines on Azure DevOps. Currently solo automation engineer delivering E2E test coverage for a marketing management client. Strong analytical and problem-solving skills.

TECHNICAL SKILLS

- **Test Automation:** Cypress (TypeScript), Selenium (Java)
- **Manual Testing:** Manual API Testing
- **Testing Frameworks:** BDD – Cucumber / Gherkin, Hybrid Framework
- **CI/CD:** Azure DevOps
- **Programming Languages:** TypeScript, Java, Python, C++, C
- **AI Productivity Tools:** GitHub Copilot
- **Database & Backend:** JDBC, DBMS
- **Web Technologies:** Basic HTML / CSS, JavaScript
- **Tools & Platforms:** Git, VS Code

PROFESSIONAL EXPERIENCE

Quality Engineer | LTM

September 2024 – Present

Web Application Automation | Marketing Management Client | Solo Automation Engineer

- **Cypress & TypeScript:** Designing, developing, and maintaining E2E automated test suites for a client web application as the solo QA automation engineer.
- **CI/CD Integration:** Integrated the entire automation suite into the web application's UAT pipeline on Azure DevOps, enabling continuous test execution and faster release feedback.
- **Manual API Testing:** Performing manual API testing to validate endpoints, request/response payloads, and backend functionality alongside UI automation coverage.
- **BDD Framework:** Implementing test scenarios with Cucumber/Gherkin syntax to improve readability and cross-functional collaboration.
- **Selenium (Java):** Writing and maintaining browser-level automation scripts for additional test coverage.
- **GitHub Copilot:** Using AI-assisted coding daily to accelerate test script development, speed up automation delivery, and increase overall test case coverage.
- **Test Architecture:** Applying BDD framework principles to build scalable, reusable test structures.
- **Agile Delivery:** Involved in sprint planning, test case design, defect tracking, and test reporting.

PROJECTS DURING TRAINING

Selenium Java – Web Automation | Training Projects 2024

- **Nescafé Website:** Automated end-to-end test scenarios for the Nescafé website using Selenium (Java), covering 80+ test cases including product browsing, navigation flows, and UI validations.
- **Swarovski Website:** Developed 80+ automated test cases for the Swarovski e-commerce portal, targeting product search, cart operations, wishlist functionality, and checkout workflows.
- **E-Commerce Websites:** Automated multiple e-commerce platforms with 80+ test cases each, covering login/registration, product filters, order placement, and cross-browser compatibility testing.

ACADEMIC PROJECTS

Smart Glass using OCR | Group Project 2023 – 2024

Technologies: Python, Raspberry Pi, Camera Module, Tesseract OCR

- Built an assistive device that scans printed text using OCR and converts it to audio via Raspberry Pi and Python, enabling hands-free content access for individuals with visual impairments.

EDUCATION

B.Tech – Electronics & Communication Engineering

2020 – 2024

Narula Institute of Technology, Kolkata | CGPA: 8.40

Higher Secondary (10+2)

2020

Old Malda K.C High School, WBCHSE, West Bengal | 86.2%

Secondary (10)

2018

Old Malda K.C High School, WBBSE, West Bengal | 85.14%

ACHIEVEMENTS

- **Rising Star Award – Q3 FY26:** Recognised by LTM for outstanding contribution and exceptional performance during Q3 FY2026.

CERTIFICATIONS

- Claude 101 Course
- API Testing with Karate Framework – Coursera
